Subject: Handling of Waste Lapping Compound

On August 5th we shipped out six (6) drums of waste lapping compound for disposal by Midwest Environmental Services Inc. Four of the six drums shipped had cardboard debris in them which caused problems in disposal. There were two 30 gallon drums placed inside two 55 gallon drums because the 30 gallon drums had no tops.

Because there were 30 gallon drums double packed in 55 gallon drums, we were charged \$75.00 per drum extra. The four (4) drums with the cardboard, we were charged \$40.00 extra for the 30 gallon drums and \$50.00 extra for the 20 gallon drums, plus \$157.00 surcharge. Because of improper drums and cardboard we were charged a total of \$397.00 over normal cost.

Please instruct the operators that any drum used for waste lapping compound must have a sealable top and that no cardboard is to be thrown into the drums!

Attached is a copy of the invoice for your review. Please take care of this matter because it keeps getting harder to dispose of our waste products at reasonable rates.
